

## How To Get Weather Information In Your Cockpit

Join the FAASafetyTeam in welcoming Garmin Representative Joe Stewart. Whether you own an aircraft or rent, there are ways to put XM Weather, ADSB and Traffic alerts in the aircraft you fly. Joe will have a full review of the newest aviation panel and portable mounted GPS flight information receivers. These new systems can bring more information to your cockpit, increasing your situational awareness thereby making your flights safer.

**Directions:** Jacksonville Airport Authority Craig airport board room located at the base of the control tower. If flying in please park at Sky Harbor.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
